

Public Notice

WSSC's Development Services Group is implementing an electronic plan review process for Minor Site Utility Plans and Site Utility Plans effective January 1, 2012. Plans will be submitted electronically with this new online process. The Applicants Guide (draft) for this new process is available on WSSC's website at wsscwater.com/businesses/permit_services/site_utility.

Electronic plan submissions will require the use of standardized basesheets and adherence to WSSC Layer naming convention. The applicable WSSC AutoCAD basesheet templates and Layer Translator files are available on our website at <http://www.wsscwater.com/home/jsp/content/land-unit.faces>.

Engineers should begin using these templates for all new projects (both paper and electronic).

WSSC plans to implement a similar electronic review process for System Extension Plans later in 2012.

Please contact Permits at 301-206-8640
