

“When documentation is received, WSSC will review your usage for the past six months to determine if it has increased as a result of this leak and an adjustment is warranted. Both water and sewer charges may be adjusted if the repair is completed within 15 days. If repairs are made after 15 days, only the sewer charges may be reviewed for a possible adjustment.”

We hope this information is useful. If you have any questions, our Customer Care Center agents will be happy to assist you.

Summary

In case of an underground leak...

- Call the WSSC's 24-hour emergency number 301-206-4002 or 1-800-634-8400. Our TTY number is 301-206-8345.
- Maintenance of the water service from the property line to the building is the property owner's responsibility.
- A Master plumber should independently confirm any leak information provided by a WSSC representative.
- If the underground leak is “on property,” WSSC recommends that the homeowner contact at least three registered plumbers to obtain repair estimates. Leaks should be repaired within 15 days of notification.
- Once the “on property” leak is repaired by a registered plumber under permit, a copy of the plumber's invoice and signed permit inspection should be faxed to 301-206-8114, or mailed to “Correspondence Services” at WSSC, 14501 Sweitzer Lane, Laurel, MD 20707. Repair documentation should be mailed to WSSC within 30 days of the discovery of the leak. We will review the account for a possible reduction in excess water and sewer charges caused by the leakage.
- If you have polybutylene (blue plastic) water pipes contact the Consumer Plumbing Recovery Center on 1-800-356-3496, prior to making repairs.

Any questions? Please call our 24-hour Emergency Services at 301-206-4002 or our Customer Care Center agents at 301-206-4001 during normal business hours.

**Washington Suburban
Sanitary Commission**

Established in 1918, today WSSC is the 8th largest water and wastewater utility in the nation, with a network of more than 5,500 miles of fresh water pipeline and nearly 5,400 miles of sewer pipeline.

Serving 1.8 million residents in Prince George's and Montgomery Counties, our drinking water has always met or exceeded federal standards.

Underground Water Service Leaks

**Washington Suburban
Sanitary Commission**

Dear Customer:

In response to a request for service, a WSSC representative has found no leaks on WSSC's water mains or on the portion of your water service line maintained by WSSC. The maintenance of the water service from that point on into the building is the property owner's responsibility. Generally this changeover occurs at or near the property line. The exact physical location will have a pipe coupling.

1. In Montgomery or Prince George's County, all repairs to underground water lines must be supervised by a master plumber registered with WSSC. Ask for the master plumber's registration number when contacting them. Registered WSSC plumbers are required to include their WSSC registration number in yellow pages display advertising.

2. It is the master plumber's responsibility to determine the location of the leak on private property. Your plumber must independently confirm any information provided by a WSSC representative. Maintenance of the water service from the property line to the building is the property owner's responsibility.

3. When hiring a master plumber to repair an underground leak, we recommend you obtain more than one estimate; prices vary. A Master plumber should independently confirm any leak information provided by a WSSC representative.

4. The master plumber must obtain a permit from WSSC, and the repair work must be inspected and approved by WSSC's Regulatory Services Group before the service line is covered. This process protects the customer, ensures that all work is performed according to the Plumbing and Gasfitting Regulations, and provides a record for warranty purposes. When the repair is completed, remember to ask the plumber for the owner's copy of the approved permit.

5. Leaks in copper or plastic pipes can generally be repaired with clamps or by tightening leaking fittings. Galvanized iron pipe has a useful life of about 30 to 40 years. If your water service is made from aging galvanized iron pipe, you may wish to consider replacing the entire water service. Once galvanized pipes begin to leak, more leaks are sure to follow.

6. A rebate program exists to help homeowners defray the expenses of repairing broken underground polybutylene (blue

plastic) water pipes. Ask your plumber what type of pipe needs repair. The leak must occur within 10 years of the date of installation of the polybutylene pipe.

Prior to making repairs, we recommend you contact the Consumer Plumbing Recovery Center regarding the possibility of reimbursement for some of the expenses:

**Consumer Plumbing
Recovery Center
P.O. Box 869006
Plano, Texas 75086-9006
Phone: 1-800-356-3496**

7. If the underground pipes are less than three years old, contact the builder or the plumber who installed the pipes. There is a three-year warranty on new underground pipes. If you have any problems getting the original plumber to honor the warranty, call our Regulatory Services Group at 301-206-8525.

8. The master plumber you hire can disconnect your water at the property line to make repairs. WSSC will turn off the water if requested, however there is a charge for this service.

9. If the leak is creating a public hazard, (damaging other properties) or is not repaired within 15 days, WSSC may have no alternative but to disconnect the water service until repairs are made.

10. The property owner is responsible for damage to other properties or public space (sidewalks, roads, etc.) caused by an "on-property" leak.

If your water meter is located outside, the water that leaked from your underground pipe may have registered on your meter. If your next WSSC bill reflects increased usage due to leakage, please mail us copies of the plumber's receipt, a description of the leak, the date of the repair, and the signed inspection permit. Documentation should be mailed to: WSSC, Correspondence Services, 14501 Sweitzer Lane, Laurel, MD 20707.
