is pleased to present

Water In Any Form

an exhibit by the

Gaithersburg Camera Club

Water. A nine year old Gaithersburg boy said it best at last year's WSSC Water Festival. Without it, he mused, "there would be no people." Simple, yet profound.

Water, just two H's and an O, makes up about 60 percent of you and me. We just can't live without it. Even a fish will tell you that. It covers nearly three-quarters of the surface of the earth. So ubiquitous we almost take it for granted. You find it as a liquid, a solid, and a gas as in the clouds overhead.

With water all around us, what a great subject for photographers including those of the Gaithersburg Camera Club who were challenged this past spring to depict "water in any form" for their monthly competition. These creative folks set out to put together a body of work that is now on display here at the WSSC Headquarters Building. What you see represents the best—all winners in that contest.

The Gaithersburg Camera Club (GCC) primarily serves upper Montgomery County, though members come from all over. The club is meant for camera enthusiasts of varying skills and interests. Its goal is to help you become a better photographer and give you a place to meet others who share your passion for photography. GCC programs and activities provide information and instruction for all skill levels.

The 100 + member club meets twice each month from September through May. See the club web site, Gaithersburgcameraclub.org, for more details—including a calendar. One meeting is devoted to hearing an expert speaker on anything photography related. The other is the monthly competition.

Members also participate in area-wide competitions (like the Montgomery County Fair) to earn additional points towards individual merit awards. There are also some special events each year. Our Exhibit Chairman arranges an exhibit of our members' work at a local venue, such as Kentland's Mansion or Gaithersburg City Hall. Or the one you see today at WSSC. We hope you enjoy our show.
