NOTE: This is a redacted version of the document. The original document contains further general notes that are not shown here. For more information, please contact the relevant authority or the WSSC directly.
TEST REQUIREMENTS FOR EXISTING XXX PVC WATER MAINS

1. The contractor shall contact Kent Wright, Systems Control Division Manager, P.O. Box 5828, Central Zone, 20026-0582, at least 5 days before any work to coordinate any of the work that will involve the underground crossings. All requests for approval shall be written in a formal letter and submitted to the attention of Mr. Wright.

2. The contractor shall contact the Pipeline Construction Division's Contract Manager, P.O. Box 5828, Central Zone, 20026-0582, at least 5 days in advance of beginning work to coordinate any of the work that will involve the underground crossings. All requests for approval shall be written in a formal letter and submitted to the attention of the Contract Manager.

3. A copy of any request for work will be sent to the WSSC Inspector, 301-206-8416, for approval before any work is started. Once approved, the inspector will be kept informed of all work being performed as a result of the request. A checklist of approved work will be maintained and will be available for review by the WSSC Inspector.

4. All work performed under any contract shall be done in accordance with approved drawings and specifications as defined in the Development Requalification Project Specifications. Improper workmanship, materials, plans and/or specifications shall not be permitted.

5. The project is to be performed by the approved contractor under the supervision and control of the WSSC Inspector. Under no circumstances will the WSSC Inspector be held responsible for any actions or inactions of the contractor while working on the project.

6. The WSSC Inspector reserves the right to inspect and monitor any work being performed to ensure compliance with the approved plans and specifications.

7. All work performed for the project shall be done in accordance with approved drawings and specifications as defined in the Development Requalification Project Specifications. Improper workmanship, materials, plans and/or specifications shall not be permitted. The contractor is held responsible for any actions or inactions of the contractor while working on the project.

8. The contract is subject to system conditions at the time of request.

9. All work performed for the project shall be done in accordance with approved drawings and specifications as defined in the Development Requalification Project Specifications. Improper workmanship, materials, plans and/or specifications shall not be permitted. The contractor is held responsible for any actions or inactions of the contractor while working on the project.

10. All work performed for the project shall be done in accordance with approved drawings and specifications as defined in the Development Requalification Project Specifications. Improper workmanship, materials, plans and/or specifications shall not be permitted. The contractor is held responsible for any actions or inactions of the contractor while working on the project.
