INDEPENDENT AUDITOR'S REPORT

The Commissioners
Washington Suburban Sanitary Commission

The Board of Trustees Washington Suburban Sanitary Commission Employees' Retirement Plan

Report on the Financial Statements

We have audited the accompanying Statements of Plan Net Position of the Washington Suburban Sanitary Commission Employees' Retirement Plan (the "Plan") as of December 31, 2014 and 2013, and the related Statements of Changes in Plan Net Position for the years then ended and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Plan preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the net position of the Plan as of December 31, 2014 and 2013, and the changes in its net position for the year ended, in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matters

As discussed in Note B to the financial statements, as of December 31, 2014, the Washington Suburban Sanitary Commission adopted Governmental Accounting Standards Board (GASB) Statement No. 67, Financial Reporting for Pension Plans- an Amendment of GASB Statement No. 25.

As discussed in Note K to the financial statements, based on the most recent actuarial valuation as of June 30, 2014, which was rolled forward to December 31, 2014 and rolled backwards to December 31, 2013, the Plan's independent actuaries determined that, at December 31, 2014 and 2013, the Plan's total pension liability exceeded its fiduciary net position by \$175.5 million and \$167.8 million, respectively.

Other Matter

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the accompanying management discussion and analysis on pages 4-12, the schedules of changes in net pension liability and related ratios, contributions and investment returns on page 30 - 33 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Plan's basic financial statements. The supplemental schedule of investments is presented for purposes of additional analysis and are not a required part of the basic financial statements.

The supplemental schedule of investments is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the supplemental schedule of investments is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Washington, D.C. BCA Watson RRe LZP

July 7, 2015

The Washington Suburban Sanitary Commission Employees' Retirement Plan (the "Plan") provides retirement benefits to the employees, retirees, and beneficiaries of the Washington Suburban Sanitary Commission. To facilitate understanding the Plan's financial performance for the years ended December 31, 2014 and 2013, management has prepared this discussion and analysis. The following discussion and analysis should be read in conjunction with the Plan's financial statements and supplementary information provided in this report.

OVERVIEW OF THE FINANCIAL STATEMENTS AND SCHEDULES

The financial information presented in this report includes two financial statements, the notes to the financial statements, and supplementary information.

The Statements of Plan Net Position show the amount of assets and deferred outflow of resources, liabilities and deferred inflow of resources, and net position held in trust for pension beneficiaries as of the end of the current and prior calendar years.

The Statements of Changes in Plan Net Position show the additions to, and reductions in, the Plan's net position during the current and prior fiscal years. The statements present the major sources and uses of funds.

The Notes to Financial Statements contain disclosures and discussions which support the data presented in the financial statements. The notes present information about the creation and administration of the Plan, significant accounting policies and investments. The notes are an integral part of the financial statements and should be considered in conjunction with any review of the financial statements.

The Supplementary Information includes additional information on the Plan's financial condition and trends, including information on changes in the net pension liability and related ratios, contributions, actuarial assumptions, investment returns, investments and actuarial assumptions.

FINANCIAL HIGHLIGHTS

Fiscal Year 2014

- As of December 31, 2014, the Plan's net position held in trust for current and future retirement benefits were \$744.0 million. This reflects an increase in the Plan's net position of \$7.2 million from the prior year.
- The net investment income was \$37.6 million for fiscal year 2014. This was comprised of \$25.8 million net appreciation in the fair market value of investments, \$13.9 million in dividends and interest, and investment expenses of \$2.2 million. For fiscal year 2013, the

net investment income was \$110.7 million. The 2014 increase reflects the continued recovery in the financial markets.

• The total investment return for 2014 was 5.4%. For the period ended December 31, 2014, the Plan returned 9.2% per annum over the past five years and 5.7% annualized over the past ten years.

Fiscal Year 2013

- As of December 31, 2013, the Plan's net position held in trust for current and future retirement benefits were \$736.8 million. This reflects an increase in the Plan's net position of \$80.6 million from the prior year.
- The net investment income was \$110.7 million for fiscal year 2013. This was comprised of \$100.3 million net appreciation in the fair market value of investments, \$12.7 million in dividends and interest, and investment expenses of \$2.3 million. For fiscal year 2012, the net investment income was \$82.7 million. The 2013 increase reflects the continued recovery in the financial markets.
- The total investment return for 2013 was 17.2%. For the period ended December 31, 2013, the Plan returned 12.2% per annum over the past five years and 6.4% annualized over the past ten years.

Fiscal Year 2014

The Plan's cash, cash equivalents and investments for fiscal year 2014 increased by \$2.0 million or 0.25%. The increase was due primarily to investment income of \$37.6 million, contributions totaling \$24.6 million, offsetting benefit payments and refunds of \$54.9 million, and a decrease in the value of collaterals received under securities lending agreements of \$5.5 million.

As shown in **Table 2a - Investments by Manager/Advisor with Rates of Returns as of December 31, 2014**, a significant portion of the Plan's investments were managed by Vanguard (18.7%), State Street Global Advisors (11.1%) and Prudential Retirement (8.4%). For the year ended December 31, 2014, only three managers/advisors reflected an average annual rate of return in excess of 10% for funds under management. Overall, the weighted average annual rate of return was 6.6% which contributed to a decrease in investment income by 66.07% to \$37.6 million.

Table 2a - Investments by Manager/Advisor with Rates of Returns as of December 31, 2014

	,	Investment Value	Percentage of Total Assets	Average Annual Rate of Return %

•	\$	750,343,627	100.0	

During 2014, the Board of Trustees met regularly to monitor investment manager performance and the following actions were taken:

 Approved the termination of fixed income manager Hughes Capital Management and, subsequently, hired of Northern Trust Asset Management to transition and manage the transfer of funds in its Core Fixed Income account.

Rebalanced the equity overweight and fixed income underweight; therefore, redeemed \$30 million and \$20 million from equity managers CastleArk and Investment Counselors of Maryland, respectively, and transferred the \$50 million to the fixed income Prudential Guaranteed Deposit Fund.

Receivables for fiscal year 2014 decreased by \$0.1 million or 13.40% due to marginal reductions in dividend and accrued interest receivables and contributions receivable from employees.

Total liabilities decreased by \$5.3 million or 9.06%. This is due primarily to a reduction in payables for collaterals received under securities lending agreements which decreased from \$47.5 million in 2013 to \$42.0 million in 2014 or 11.59%.

Fiscal Year 2013

The Plan's cash and cash equivalents and investments for fiscal year 2013 increased by \$71.3 million or 9.86%. The increase was due primarily to investment income of \$110.7 million, contributions totaling \$23.4 million, offsetting benefit payments and refunds of \$53.5 million, and a decrease in the value of collaterals received under securities lending agreements of \$10.3 million.

As shown in **Table 2b - Investments by Manager/Advisor with Rates of Returns as of December 31, 2013**, a significant portion of the Plan's investments were managed by Vanguard (17.2%), State Street Global Advisors (9.6%) and CastleArk Management (9.3%). For the year ended December 31, 2013, most managers/advisors reflected an average annual rate of return in excess of 10% for funds under management. Overall, the weighted average annual rate of return was 16.3% which contributed to an increase in investment income by 33.97% to \$110.7 million.

Table 2b - Investments by Manager/Advisor with Rates of Returns as of December 31, 2013

	\$ 742,799,550	100.0	

During 2013, the Board of Trustees met regularly to monitor investment manager performance and Board actions included the following:

- Approved the transfer of \$12 million from Income Research & Management (IR&M) for the April, May and June 2013 annuity payments to meet annual liquidity needs and rebalanced the real return (or TIPs) asset class back to below target.
- Agreement to correct equity overweight and fixed income underweight; therefore, redeemed \$30 million from the Vanguard Institutional Total Stock Market Index Fund and transferred it to Prudential Guaranteed Deposit Fund for fiscal year 2014 annuity payments.
- Reviewed the necessity of two Guaranteed Deposit Fund accounts at Prudential, and voted to merge the two contracts into one effective January 1, 2014, saving approximately \$15,000 in annual fees.

Receivables for fiscal year 2013 decreased by \$0.1 million or 11.32% due to marginal reductions in dividend and accrued interest receivables and contributions receivable from employees.

Total liabilities decreased by \$9.4 million or 13.71%. This is due primarily to a reduction in payables for collaterals received under securities lending agreements, which decreased from \$57.8 million in 2012 to \$47.5 million in 2013 or 17.75%.

End of Year	\$ 743,965,038	\$	736,768,598	\$ 656,157,751	\$	7,196,440	0.98	\$	80,610,847	12.29

Fiscal Year 2014

Net investment income was comprised of interest and dividends and net appreciation in the fair value of investments less investment expenses. Interest and dividends increased, from \$12.7 million in 2013, to \$13.9 million in 2014. The financial markets reflected favorable conditions during the year and, accordingly, there was a net appreciation in the fair value of the investments of \$25.8 million for 2014, compared to \$100.3 million for fiscal year 2013. The increase in net investment income was primarily due to most of the Plan's funds reflecting positive rates of return. The Plan had an overall weighted average rate of return of 6.6% for financial year 2014.

Investment expenses decreased by \$0.2 million or 6.93%. Investment expenses represent approximately 0.3% or 30 basis points of average net position.

Participant and Plan sponsor contributions increased in 2014 to \$24.6 million from \$23.4 million in 2013 due to an increase in the number of employees and higher salary levels. Retirement annuity benefit payments, excluding refunds, totaled \$54.5 million. This represented an increase of \$1.4 million over 2013, which is due to an increase in cost-of-living and the number of retirees.

Fiscal Year 2013

Net investment income was comprised of interest and dividends and net appreciation in the fair value of investments less investment expenses. Interest and dividends decreased, from \$13.4 million in 2012, to \$12.7 million in 2013. The financial markets reflected favorable conditions during the year ended December 31, 2013, and accordingly, there was a net appreciation in the fair value of the investments of \$100.3 million for 2013, compared to \$71.0 million for fiscal year 2012. The increase in the net investment income was primarily due to most of the Plan's

funds reflecting positive rates of return. The Plan had an overall weighted average rate of return of 16.3% for financial year 2013.

Investment expenses increased by \$0.6 million or 37.9%. Investment expenses represent approximately 0.3% or 30 basis points of average net position.

Participant and Plan sponsor contributions increased in 2013 to \$23.4 million from \$22.4 million in 2012 due to an increase in the number of employees and higher salary levels. Retirement annuity benefit payments, excluding refunds, totaled \$53.2 million. This represented an increase of \$2.0 million over 2012, which is due to an increase in cost-of-living and the number of retirees.

PLAN FUNDING

Fiscal year 2014

The Plan's actuarially determined target rate of investment return is 8.0% net of expenses. On an annual or biennial basis, the market value of the Plan's assets and its investment gains and losses are reviewed by the Plan's actuary to determine the viability and funding progress of the Plan, the latest of which was performed effective June 30, 2014.

The Plan began using the average value method to determine actuarial asset value effective July 1, 2007. This smoothing method explicitly recognizes each year's investment gain or loss over a five-year period with the final actuarial value not less than 80% or more than 120% of the market value of assets. The Plan implemented Governmental Accounting Standards Board ("GASB") Statement No. 67 Financial Reporting for Pension Plans – an amendment of GASB Statement No. 25 in fiscal year 2014. As required by GASB Statement No. 67, the Plan's fiduciary net position as a percentage of total pension liability was 80.9% as of December 31, 2014. This represented a slight decline from the 81.5%, which resulted from applying the current year's GASB Statement No. 67 standards to the prior year's financial results as of December 31, 2013.

As required in prior years by Governmental Accounting Standards Board ("GASB") Statements No. 25 Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans and 27, Accounting for Pension by State and Local Governmental Employers, the Plan's reported funding progress (expressed as the ratio of the actuarial value of assets to the actuarial accrued liability) was 93.7% as of June 30, 2013. Applying these standards to the current year's financial results, the Plan's funding progress (expressed as the ratio of the actuarial value of assets to the actuarial accrued liability) was 93.3% as of June 30, 2014.

Fiscal year 2013

The Plan's actuarially determined target rate of investment return is 8.0% net of expenses. On an annual or biennial basis the market value of the Plan's assets and its investment gains and losses

are reviewed by the Plan's actuary to determine the viability and funding progress of the Plan, the latest of which was performed effective June 30, 2013.

The Plan began using the Average Value Method to determine actuarial asset value effective July 1, 2007. This smoothing method explicitly recognizes each year's investment gain or loss over a five-year period with the final actuarial value not less than 80% or more than 120% of the market value of assets. As required by Governmental Accounting Standards Board ("GASB") Statements No. 25 Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans and 27, Accounting for Pension by State and Local Governmental Employers, the Plan's reported funding progress (expressed as the ratio of the actuarial value of assets to the actuarial accrued liability) was 93.7% as of June 30, 2013.

OTHER SIGNIFICANT MATTERS

Fiscal Year 2014

Throughout 2014, the U.S. economy continued its slow but steady growth trajectory even as the Federal Open Market Committee tapered its monthly purchases of Treasuries and mortgagebacked securities. Quantitative Easing officially ended, but the Federal Reserve reiterated its assurance that the record low benchmark Federal funds rate of 0% to 0.25% would persist for a "considerable time." Investors remained bullish, and by 2014 year-end, the Dow was up 7.5% and the S&P was up 13.7%. The Russell 2000 lagged the larger cap indices and was up only 4.9% -- reversing two consecutive years of small-cap outperformance. Developed international markets continued to lag U.S. returns, due to slower growth and the strong U.S. dollar. Throughout the year numerous events could have upset the market momentum and economic recovery--from Winter 2014's "Snowmaggedon," to geopolitical activities in the Ukraine and Middle East, and the dramatic drop in oil and gas prices--but its core strength would not be deterred. Inflation remained tame, rising just 0.8% in 2014 largely due to ample oil supplies and lower gasoline prices. Consumers benefited from the gas price drop just in time for the holiday shopping season, although the longer-term impact on oil and gas producers and suppliers remains to be seen. Unemployment declined to 5.6%, a significant and marked improvement from its October 2009 peak of 10%. Despite a third quarter upward revision to 5%, Gross Domestic Product remained on its slow-but-steady track, growing 2.4% year-over-year in 2014 and surpassing its 2.2% growth in 2013.

Fiscal Year 2013

Throughout 2013, fiscal standoff news could have led investors to question how the lack of agreement would impact the U.S. economy. In fact, despite sequestration, federal spending reductions, payroll tax increases, and the federal government shutdown, the economy continued to grow. Throughout the first-half of the year, markets tried to anticipate when the tapering of monthly Federal Open Market Committee (FOMC) purchases of mortgage-backed securities and Treasuries would begin, as economic data seemed to support earlier tapering. However, by September, disappointing economic data and the uncertainty created by the fiscal standoff in

Congress led the Federal Reserve to hold off on scaling back its quantitative easing program. By December, the FOMC did announce it would begin to reduce bond purchases, and investors reacted favorably, interpreting this as confirmation that the U.S. economy was strong enough to justify the move. While maintaining its commitment to policy accommodation, the Federal Reserve left the federal funds rate unchanged at zero to 0.25 percent. The continued FOMC large-scale asset purchases during 2013 supported equity markets, and investors responded to increased corporate earnings as risk-averse corporations kept costs in check and improved balance sheets. In Europe, no news was good news as policymakers directed progress in a slow recovery from the debt crisis.

ADDITIONAL INFORMATION

These financial statements present the finances of the Plan in accordance with accounting principles generally accepted in the United States of America. Questions about these financial statements or other inquiries should be addressed to the Executive Director, WSSC Employees' Retirement Plan, Washington Suburban Sanitary Commission, 14501 Sweitzer Lane, Laurel, MD 20707-5901.

NOTE A. DESCRIPTION OF PLAN

General

The Plan, a single employer contributory defined benefit retirement plan, was established in 1967 to provide retirement and death benefits for the employees of the Washington Suburban Sanitary Commission ("WSSC") under conditions set forth in the Plan Document based on an employee's age, length of service, and compensation. The Retirement Plan Document is amended from time to time, with the Plan last amended on December 18, 2012. The Plan may be amended by Commission resolution or by the Executive Director on behalf of the Commission.

WSSC implemented the Open Version of the Plan on July 1, 1978. Members of the Plan as of June 30, 1978 had an option to be included in the Open Version. This option expired December 31, 1978. The Open Version is mandatory for new employees. It generally provides for reduced employee contributions and benefits.

As of December 31, 2014 and 2013, there were 1,540 and 1,525 employees, respectively, participating in the Open Version of the Plan, and 9 and 12 employees, respectively, participating in the Closed Version of the Plan, a total of 1,549 and 1537 employee participants, respectively.

As of December 31, 2014 and 2013, there were 1,542 and 1,517 retirees and/or beneficiaries, respectively, receiving benefits from the Plan, and there were 86 and 74 terminated vested employees, respectively, not yet receiving benefits. Thirteen and Five employees retired in fiscal years 2014 and 2013, respectively, and began receiving benefits in subsequent fiscal years.

The Plan provides a review process for participants whose claim for benefits is denied. There were no reviews pending as of December 31, 2014 and 2013.

Contributions

The Plan requires employees under the Closed Version to contribute 6% of gross wages and employees under the Open Version to contribute 3% of gross wages as a condition of employment.

Expenses

WSSC pays the administrative expenses of the Plan, other than investment management and consulting fees.

NOTE A. DESCRIPTION OF PLAN (Continued)

Pension Benefits

The Plan provides for 100% vesting of retirement benefits after five years of credited service.

Generally, the normal retirement benefits payable to an eligible participant are equal to the sum of:

- 1. 2.1% of final average monthly compensation multiplied by the Closed Version credited service, plus
- 2. 1.4% of final average monthly compensation multiplied by the Open Version credited service where the sum of Closed Version credited service and Open Version credited service, exclusive of accumulated sick leave service is subject to a maximum of 36 years.

The Plan provides options for disability and early retirement to eligible participants or their surviving spouses.

The Plan provides for periodic cost of living increases to retirement benefits. Participants covered by the Closed Version will receive an increase two months following a sustained increase in the Consumer Price Index of 3% or more. Participants in the Open Version receive an increase each March 1, based on the preceding calendar year's increase in the Consumer Price Index. The first increase may be pro-rated depending on the time of retirement.

Plan Termination

In the event of termination, Plan assets are to be allocated in the following priorities:

- 1. Expenses, fees and other charges under the Plan, not previously paid.
- 2. Pension benefits based upon contributions made by employees and interest earned thereon.
- 3. Pension benefits based upon contributions made by the employer which are vested.
- 4. All other pension benefits under the Plan.

NOTE B. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The Plan's financial statements are presented in accordance with Governmental Accounting Standards Board ("GASB") Statements. The Statements requires two basic financial statements: the statement of plan net position and the statement of changes in plan net position. For financial reporting purposes, the Plan is considered a retirement plan.

Basis of Accounting

The financial statements of the Washington Suburban Sanitary Commission Employees' Retirement Plan (the "Plan") are presented on the accrual basis of accounting. Contributions are recognized by the Plan when the payments become due from WSSC. Investment income is recognized when earned. Deductions are recognized when due in accordance with the terms of the Plan.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Cash and Cash Equivalents

The Plan considers all cash and highly liquid investments with an original maturity of three months or less to be cash and cash equivalents.

Investments

Investments are stated at fair value. The fair value is generally based on quoted market prices on the last business day of the Plan's year end. Plan investments in market-traded securities, including U.S. government and agency securities, municipal and corporate bonds, and common stock are reported at last quoted sales/bid prices provided by independent pricing vendors. Holdings in SEC-registered external investment pools are reported at fair value based upon the Net Asset Value (NAV) of shares/units held at year end, provided by independent pricing vendors. Cash equivalents are valued at cost, which approximates fair value.

NOTE B. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

The Plan holds investment contracts with Prudential Financial. The fair value of these contracts is determined based on the fair value of the underlying pooled assets, and is an estimate only and not the result of a precise calculation which would be done at contract discontinuance or to measure the impact of excess withdrawals in any calendar year. It does not constitute an offer by Prudential Financial or a final experience adjustment.

Net appreciation (depreciation) in the fair value of investments reflected in the Statements of Changes in Plan Net Position includes realized gains and losses on investments that were sold during the year and unrealized appreciation in the fair value of investments.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the exdividend date.

Reclassifications

Certain prior year balances may have been reclassified to conform with the current year presentation. These reclassifications have no effect upon reported net position held in trust for benefits.

Accounting Changes

GASB has issued Statement No. 65, *Items Previously Reported as Assets and Liabilities*. This statement reclassifies certain items that were previously reported as assets and liabilities as deferred outflows of resources and deferred inflows of resources, or as outflows of resources and inflows of resources, respectively. The statement is effective for periods beginning after December 15, 2012. The implementation in fiscal year 2013 did not have material impact on the Plan's financial statements.

In June 2012, GASB issued Statement No. 67, Financial Reporting for Pension Plans—an amendment of GASB Statement No. 25. The Statement replaces the requirements of Statements No. 25, Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans, and No. 50, Pension Disclosures, as they relate to pension plans that are administered through trusts or equivalent arrangements that meet certain criteria. This Statement is effective for financial statements for fiscal years beginning after June 15, 2013. The Plan implemented this Statement in fiscal year 2014.

NOTE B. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

In February 2015, GASB issued Statement No. 72, Fair Value Measurement and Application. The Statement addresses accounting and financial reporting issues related to fair value measurements. This Statement also provides guidance for applying fair value to certain investments and disclosures related to all fair value measurements. The requirements of this Statement are effective for financial statements for periods beginning after June 15, 2015. The Plan's management is evaluating the impact of the pronouncement on its financial statements.

NOTE C. CONTRIBUTIONS

WSSC funds annual pension plan costs based upon a level percentage of payroll costs. WSSC's contribution, which is paid in a lump sum on July 1 each year, amounted to \$20,965,016 and \$20,498,919 on July 1, 2014 and 2013, respectively. At December 31, 2014 and 2013, \$10,482,508 and \$10,249,460, respectively, of these contributions were recorded as deferred prefunded WSSC contributions. For the years ended December 31, 2014 and 2013, the Plan recognized WSSC's contributions of \$20,731,968 and \$19,765,897, respectively.

NOTE D. TRUSTEES OF THE PLAN

WSSC established a Board of Trustees (the "Board") for the Plan to be responsible for the investment management of the Plan's assets for the exclusive benefit of the Plan's participants. The trustees are governed by a Trust Agreement. The agreement provides for trustees to be appointed by WSSC and for the eleven-member Board to be composed of two Commissioners, four employees who are participants of the Plan, two representatives of the public, two retirees who are participants in the Plan, and the Executive Director of the Plan.

The administration of the Plan is managed by the Executive Director of the WSSC Employee Retirement Plan who is appointed by the General Manager of WSSC.

NOTE E. INTERNAL REVENUE STATUS

The Plan obtained its latest determination letter dated May 25, 2012, in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code. The Plan is currently designed and being operated in compliance with the applicable requirements of the Internal Revenue Code and, therefore, the Plan was qualified and the related Trust was tax exempt as of December 31, 2014 and 2013.

NOTE F. INVESTMENTS

Investment Policy

The Plan's investment policy and any changes to the policy are adopted by the Board of Trustees of the Plan. The most recent version of the policy was approved in April 2011 and contains long-term asset allocation ranges.

The primary objective of the investment policy is to assure that assets will be available to pay retirement benefits throughout the life of the Plan and to maintain or improve the market value of the fund relative to vested and accrued benefit liabilities. The objectives seek to preserve the actuarial soundness of the Plan by achieving a long-term return of at least the actuarial return rate and to prudently manage the inherent investment risks that are related to the achievement of this goal.

Long-term asset allocation ranges are developed based on several factors including: the long-term investment goals of the Plan; the Trustee's tolerance for short-term losses; the Plan's liquidity needs; and any legal or regulatory requirements.

As of December 31, 2014 and 2013, the Plan's long-term asset allocation ranges were as follows:

	Target	Range
U.S. Stocks	38%	33 - 43%
Non-U.S. Stocks	12	9 - 15
Emerging Markets Stocks	5	2 - 8
Global Tactical Asset Allocation	15_	11 - 19
Total equity	70	
Fixed Income	21	17 - 25
Real Return Strategies	5	0 - 10
Real Estate	4	0 - 8
Total	100	

The Plan has a rebalancing policy, which allows the Executive Director and staff the flexibility to adjust assets classes for purposes of rebalancing without approval from the Board of Trustees.

NOTE F. INVESTMENTS (Continued)

Money-Weighted Rate of Return

For the years ended December 31, 2014 and 2013, respectively, the annual money-weighted rate of return on Plan investments, net of investment expense, was 5.21% and 17.31%. The money-weighted rate of return considers the changing amounts actually invested during a period and weights the amount of pension plan investments by the proportion of time they are available to earn a return during that period. External cash flows are determined on a monthly basis and are assumed to occur at the end of each month. External cash inflows are netted with external cash outflows, resulting in a net external cash flow in each month. The money-weighted rate of return is calculated net of investment expenses.

Risks Common to Investments

The Plan's investments are subject to the following risks common to investments:

Custodial Credit Risk is the risk that, in the event of a failure of the counterparty, the Plan will not be able to recover its investment or collateral securities that are in the possession of an outside party. Investment securities are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the Plan, and are held by either the counterparty or the counterparty's trust department or agent but not in the Plan's name.

The Plan's investments for fiscal year 2014 and 2013 are partially insured and registered in the Plan's name, and are generally segregated by the counterparty in a manner to protect them from certain claims by creditors. The Plan also invests in mutual and commingled trust funds which are not generally exposed to custodial credit risks. At December 31, 2014 and 2013, there were no deposits subject to custodial credit risk.

• *Credit Risk* is the risk that an issuer to an investment will not fulfill its obligations. The Plan seeks to maintain a diversified portfolio of fixed income securities in order to obtain the highest total return at an acceptable level of risk.

NOTE F. INVESTMENTS (Continued)

As of December 31, 2014 and 2013, the quality ratings of the Plan's fixed income investments in U.S. Government obligations and corporate bonds were as follows:

Fiscal Year 2014 Quality Rating	Fair Value	Percentage
U.S. Government and Agency Bonds:		
AAA/AA+	\$ 59,194,454	69.77%

NOTE F. INVESTMENTS (Continued)

Certain mutual and/or commingled funds of the Plan maintain investments that includes fixed income securities, such as, the Vanguard High Yield Corporate (Vanguard) and Wellington OIA (Wellington) funds. As of December 31, 2014 and 2013, the ratings of the underlying securities of the Vanguard fund were AAA/BBB/BB/Below B and AAA/BB/B/Below B, respectively. Ratings were unavailable for the underlying securities of the Wellington fund. The other mutual funds, which were equity-based, and the investment contracts were unrated.

• Interest Rate Risk is the risk that changes in interest rates will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment, the greater the sensitivity of its fair value to changes in market interest rates.

Information about the sensitivity of the fair values of the Plan's investments to market interest rate fluctuations is provided by the following table that shows the distribution of the Plan's fixed income investments by maturity:

Fiscal Year 2014

		Remaining Maturities (In Months)					
Investment Type	Total	12 Months Or Less	13 to 24 Months	25 - 60 Months	More Than 60 Months		
U.S. Government and Agency bonds:							
Mortgage-backed securities	\$ 16,413,499	\$ 84,112	\$ 6,593	\$ 156,091	\$ 16,166,703		
U.S. Treasury Notes	42,780,955	4,410,214	9,499,203	4,060,634	24,810,904		
Corporate bonds	25,647,793	579,776	475,689	5,841,810	18,750,518		
	\$ 84,842,247	\$ 5,074,102	\$ 9,981,485	\$ 10,058,535	\$ 59,728,125		

Fiscal Year 2013

	Remaining Maturities (In Months)						
Investment Type	Total	12 Months Or Less	13 to 24 Months	25 - 60 Months	More Than 60 Months		
U.S. Government and Agency bonds:							
Mortgage-backed securities	\$14,956,346	\$ 393,486	\$ 15,294	\$ 243,214	\$14,304,352		
U.S. Treasury Notes	38,251,154	1,956,170	2,813,927	7,295,607	26,185,450		
U.S. Treasury Bills	2,825,000	2,825,000	-	-	-		
Corporate bonds	24,142,089	7,431,425	591,474	6,851,176	9,268,014		
	\$80,174,589	\$12,606,081	\$ 3,420,695	\$14,389,997	\$49,757,816		

The mortgage-back securities listed above are considered highly sensitive to interest rate risk.

NOTE F. INVESTMENTS (Continued)

Also, as of December 31, 2014 and 2013, the weighted average maturity (WAM) of the underlying securities of the Vanguard High Yield Corporate Fund (a mutual and/or commingled fund of the Plan) was 4.8 years and 4.6 years, respectively. The WAM of the other mutual and/commingled funds were unavailable.

• Foreign Currency Risk is the risk that changes in exchange rates will adversely affect the fair value of an investment in a foreign financial institution. The Plan mitigates this risk by limiting its investments in non-U.S. securities.

As of December 31, 2014 and 2013, the Plan's mutual and/or commingled funds that contained underlying foreign related investments were as follows:

	 2014	 2013
Morgan Stanley Investment Management		
International Equity Trust	\$ 61,127,022	\$ 64,933,451
Dimensional Fund Advisors	30,643,893	32,059,068
Wellington OIA Fund	53,051,369	52,765,421
Blackrock Investments	59,409,760	58,160,373
JP Morgan Global Focus Fund	59,505,022	57,376,228
Voya Clarion Global Securities	 26,471,558	 23,208,044
Total	\$ 290,208,624	\$ 288,502,585

• Concentration of Credit Risk - Individual investments that represent 5 percent or more of the fair value of the Plan's net position are as follows:

	2014	2013
ICM Small Company Portfolio Vanguard Total Stock Market Index Fund	\$ 45,364,554 95,536,676	\$ 63,756,719 84,847,744
State Street Global Advisor	82,980,116	73,199,538
Morgan Stanley Investment Management		
International Equity Trust	61,127,022	64,933,451
Vanguard High Yield Corporate Fund	44,571,364	42,575,928
BlackRock Global Allocation Fund	59,409,760	58,160,373
Wellington OIA Fund	53,051,369	52,765,421
JP Morgan Global Focus Fund	59,505,022	57,376,228

NOTE F. INVESTMENTS (Continued)

Except for investments in U.S. Government or Agency securities, investment managers invest no more than 7 percent of their portion of Plan assets, at cost, and no more than 10 percent at market, in securities of any one issuer or its subsidiaries or affiliates.

NOTE G. INVESTMENT IN REAL ESATATE FUND

The Plan invests in the Voya Clarion Global Real Estate Securities Trust Fund, which is valued using quoted market prices on the last business day of the Plan's year end. In fiscal year 2013, the holding was transferred from the CBRE Clarion Global REIT to a comparable collective trust with Voya Financial®.

NOTE H. SECURITIES LENDING

The Board of Trustees permits the Plan to lend its securities to broker-dealers and other entities (the "Borrowers") for collateral that will be returned for the same securities in the future. The Plan's custodian is the agent in lending the Plan's securities for collateral of 102 percent for domestic securities and 105 percent for international securities. The custodian receives cash, securities or irrevocable bank letters of credit as collateral. All securities loans can be terminated on demand by either the Plan or the Borrowers. Cash collateral received from the Borrowers is invested by the lending agent, as an agent for the Plan, in a shortterm investment pool in the name of the Plan, with guidelines approved by the Board. Such investments are considered a collateralized investment pool. The relationship between the maturities of the investment pool and the Plan's loans is affected by the maturities of securities loans made by other plan entities that invest cash collateral in the investment pool, and which the Plan cannot determine. The Plan records a liability for the return of the cash collateral shown as collateral held for securities lending in the Statements of Plan Net Position. The Board does not restrict the amount of loans the lending agent may make on its behalf. The agent indemnifies the Plan by agreeing to purchase replacement securities, or return the cash collateral thereof, in the event a Borrower fails to return loaned securities or pay distributions thereon.

As of December 31, 2014 and 2013, the fair value of securities on loan was \$42,021,952 and \$46,507,687, respectively. Cash received as collateral and the related liability of \$43,064,028 and \$47,528,701 as of December 31, 2014 and 2013 are shown on the Statements of Plan Net Position. Securities received as collateral are not reported as assets since the Plan does not have the ability to pledge or sell the collateral securities.

NOTE H. SECURITIES LENDING (Continued)

Securities lending revenues and expenses amounting to \$137,907 and \$166,294, respectively, for December 31, 2014 and \$166,294 and \$189,739, respectively, for December 31, 2013, have been classified with investment income and investment expenses, respectively, in the accompanying financial statements.

The following represents the balances relating to the securities lending transactions as of December 31, 2014 and 2013:

		air Value of Jnderlying Securities	Cash Collateral Investment Value	
<u>December 31, 2014</u>				
Securities Loaned for Cash Collateral

Total	\$	46,507,687	\$	47,528,701

At year-end, the Plan has credit risk exposure to Borrowers because the amount the Plan owes the Borrowers is less than the amounts the Borrowers owe the Plan. The Plan is fully indemnified by its custodial bank against any losses incurred as a result of Borrower default.

Custodial credit risk is the risk that, in the event of the failure of the counterparty, the Plan will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. At December 31, 2014 and 2013, there were no funds held by a counterparty that was acting as the Plan's agent in securities lending transactions.

NOTE I. RISKS AND UNCERTAINTIES

The Plan invests in various investment securities that are exposed to various risks such as interest rate, market, and credit risk. Due to the level of risk associated with investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of plan net position.

NOTE J. RELATED-PARTY TRANSACTIONS

An affiliate of the Plan's custodian, Northern Trust Asset Management, became an investment manager for the Plan in fiscal year 2014. At December 31, 2014, funds managed totaled \$61.6 million, and comprised of cash equivalents and investments of \$3.2 million and \$58.4 million, respectively. For the year ended December 31, 2014, the Plan incurred approximately \$19,233 in management fees with this investment manager.

NOTE K. NET PENSION LIABILITY OF WSSC

The components of the net pension liability of WSSC at December 31, 2014 and 2013 were as follows:

	2014	2013
Total pension liability	\$ 919,442,048	\$ 904,618,041
Plan fiduciary net position	(743,965,030)	(736,768,598)
WSSC's net pension liability	\$ 175,477,018	\$ 167,849,443
Plan's fiduciary net position as a percentage of the		
total pension liability	80.91%	81.45%

Actuarial assumptions

The total pension liability was determined by an actuarial valuation as of July 1, 2014, using the following actuarial assumptions, applied to all periods included in the measurement:

	2014	2013
Inflation	3.50%	3.50%
Salary increases	5.00%	5.00%
Investment rate of return	8.00%	8.00%

NOTE K. NET PENSION LIABILITY OF WSSC (Continued)

The mortality rates were based on the RP-2000 Healthy Annuitant Mortality Table for Males or Females. The GAM83 tables with 10-year set forward were used for the valuation of disabled members.

The actuarial assumptions used in the July 1, 2014 valuation were based on the results of an actuarial experience analysis prior to 2010. The next comprehensive funding and assumption review is scheduled for 2015.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimates ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. This is then modified through a Monte-Carlo simulation process, by which a (downward) risk adjustment is applied to the baseline expected return. Best estimates of arithmetic real rates of return for each major asset class included in the pension plan's target asset allocation and the final investment return assumption are summarized in the following table:

	2014	2013
Asset class:		_
Domestic equity	5.70%	5.70%
International equity - developed	5.80%	5.80%
International equity - emerging	6.80%	6.80%
Fixed income - investment	2.30%	2.30%
Fixed income - high yield	4.10%	4.10%
Treasuries (cash equivalent)	0.75%	0.75%
Real estate	4.10%	4.10%

Discount Rate

The discount rate used to measure the total pension liability was 7.65%. The projection of cash flows used to determine the discount rate assumed that plan member contributions will be made at the current contribution rate and that Commission contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rate.

Based on those assumptions, the pension plan's fiduciary net position was projected to be exhausted in the year 2066.

NOTE K. NET PENSION LIABILITY OF WSSC (Continued)

Therefore, the discount rate represents the single equivalent rate resulting from discounted at the long term expected rates of return until 2066 and discounting with the 20 year municipal bond index rate of 3.15% thereafter.

Other Key Actuarial Assumptions

The other key actuarial assumptions that determined the total pension liability as of December 31, 2014 and 2013 included:

Valuation date	July 1, 2014	July 1, 2014
Measurement date	December 31, 2014	December 31, 2013
Inflation	3.50%	3.50%
Salary increased including inflation	5.00%	5.00%

Sensitivity of the Net Pension Liability to changes in the Discount Rate

The following presents the net pension liability of the Plan, calculated using the discount rate of 7.65%, as well as what the Plan's net pension liability would be if it were calculated using a discount rate that is 1 percentage point lower (6.65%) or 1 percentage point higher (8.65%) than the current rate.

	Current		
	1% Decrease 6.65%	Discount Rate 7.65%	1% Increase 8.65%
WSSC's net pension liability (2014)	\$ 279,342,742	\$ 175,477,018	\$ 87,246,132
WSSC's net pension liability (2013)	270,040,558	167,849,442	81,041,088

NOTE L. SUBSEQUENT EVENTS

The Plan has evaluated events subsequent to December 31, 2014 and through July 7, 2015, the date the financial statements were available to be issued, and determined there have not been any events that have occurred that would require adjustments to the financial statements.
