

COLESVILLE ROAD TRANSMISSION WATER MAIN REPLACEMENT

A WSSC PROJECT IS COMING TO YOUR NEIGHBORHOOD! WSSC (Washington Suburban Sanitary Commission) maintains over 11,000 miles of water and sewer mains and after nearly a century of providing safe and reliable water and sewer service to the residents of Montgomery and Prince George's counties, WSSC is facing the challenge of decaying infrastructure. In keeping with WSSC's commitment to providing our customers with safe, quality water and wastewater service, we are renewing our aging infrastructure at a rate of approximately 60 miles of water mains and 56 miles of sewer mains annually.

[WSSC plans to meet with your community in the near future to discuss this project. Additional information is forthcoming.](#)

Project Overview

The water mains along Colesville Road and the connections to its intersecting streets will be replaced with new ductile iron pipe, which will reduce the frequency of water main breaks. In the event your water service line is galvanized pipe, WSSC will replace the portion of the water main between the public main and the property line connection, at no cost to you.

Scope of Work

- WSSC will rehabilitate 1.88 miles of water mains.
- The current water mains were installed in the 1920's to 1940's and are nearing the end of their life cycle.

Project Schedule

The design for the Colesville Road Transmission Water Main Replacement Project has been completed. The construction schedule is estimated and may change based on issuance of permit or contracts. Inclement weather could affect the proposed project schedule.

- Estimated design completion: Winter 2016
- Estimated construction start: Summer 2017
- Estimated construction completion: Spring 2019
- Anticipated work hours: Tentative, to be determined by the Maryland State Highway Authority construction permit.

Service Interruptions and Environmental Impacts

- **Water service may be interrupted for a few hours, while the new main is being connected. Customers will receive a 48 advance notification for service interruptions that last more than 8 hours.**
- WSSC is working closely with residents and regulatory agencies to minimize disruptions to traffic.
- Some trees may have to be pruned or removed to accommodate the work. Residents will be notified prior to construction, if there is a need for any tree removal.
- WSSC will restore the area when construction is completed.

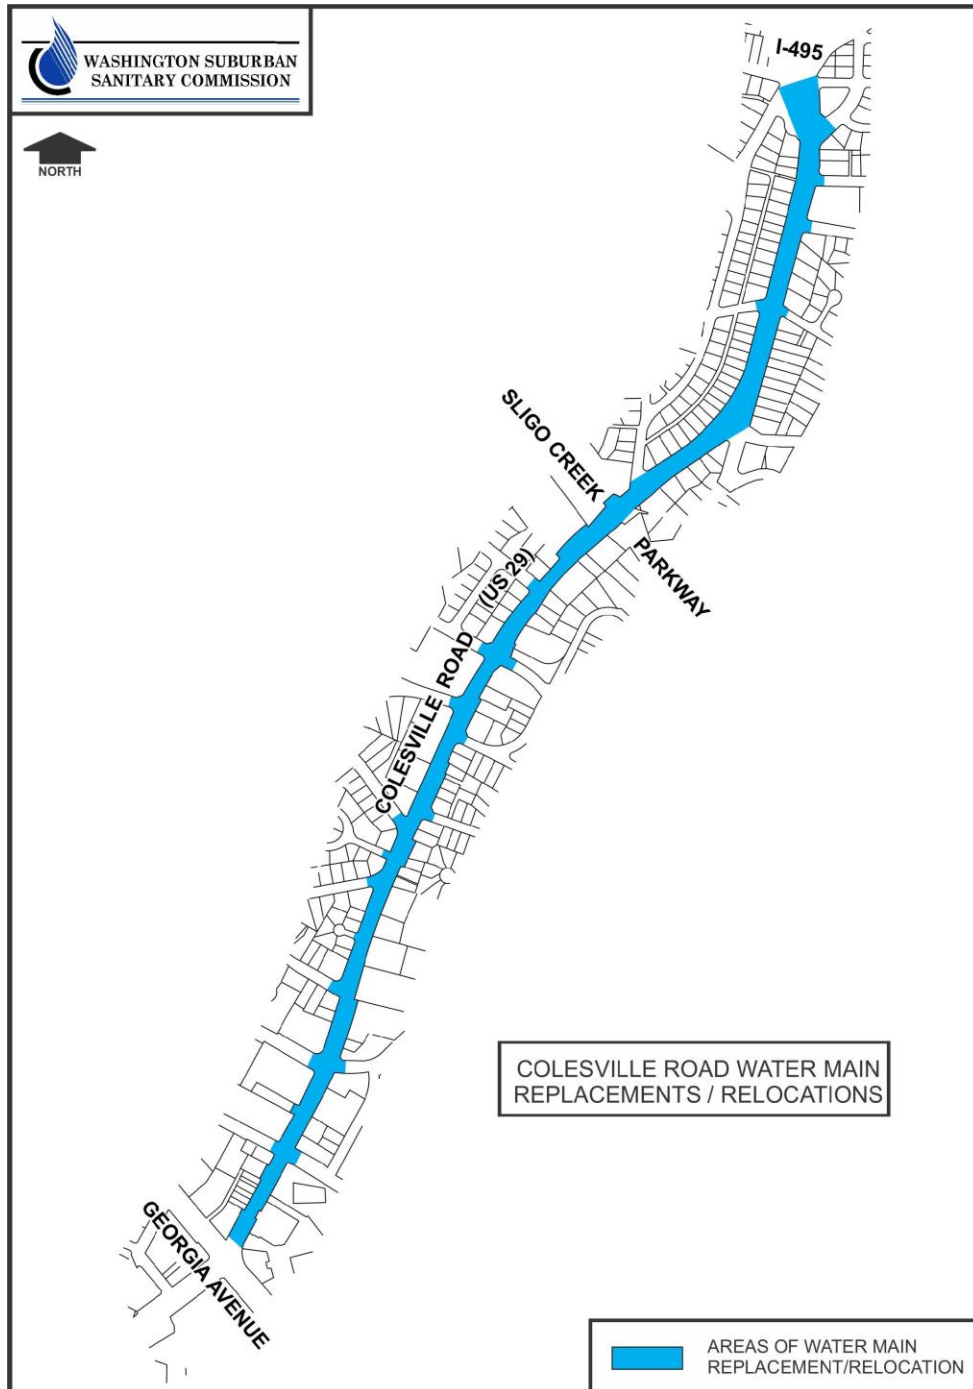

Contact Information/Questions

- Project Manager, Yuezhong Wang, 301-206-8824 or by e-mail at Yuezhong.Wang@wsscwater.com and refer to Project No. BT5977A15
- **Contact the 24-Hour Emergency Call Center at [301-206-4002](tel:301-206-4002), in the event of a water or sewer emergency.**
