

GEORGIA AVENUE 16-INCH WATER MAIN REPLACEMENT

A WSSC PROJECT IS COMING TO YOUR NEIGHBORHOOD! WSSC (Washington Suburban Sanitary Commission) maintains over 11,000 miles of water and sewer mains and after nearly a century of providing safe and reliable water and sewer service to the residents of Montgomery and Prince George's counties, WSSC is facing the challenge of decaying infrastructure. In keeping with WSSC's commitment to providing our customers with safe, quality water and wastewater service, we are renewing our aging infrastructure at a rate of approximately 60 miles of water mains and 56 miles of sewer mains annually.

[WSSC plans to meet with your community in the near future to discuss this project. Additional information is forthcoming.](#)

Project Overview

The 16-inch water main under the Georgia Avenue (MD Route 97) between the Connecticut Avenue and the Denley Road were installed in 1940's, 1950's and 1960's and are nearing the end of their life cycle. This project will replace the existing water main with new ductile iron pipe, which will reduce the frequency of water main breaks and provide a reliable safe drinking water. In the event your water service line is galvanized pipe, WSSC will replace the portion of the water between the water main and the property line at no cost to you.

Scope of Work

- WSSC will replace a total of 2.1 miles of water main as shown in the attached Project Map.
- Affected Streets Include: Georgia Avenue, Aspen Hill Road, Verona Drive, Regina Drive, May Street, Helsel Drive, Rippling Brook Drive, Kayson Street, Janet Road, Hathaway Drive, Weller Road and Epping Road.

Project Schedule

The estimated project schedule for the Georgia Avenue 16" Transmission Water Main Replacement, as denoted below is based on preliminary design and construction schedule. These dates may change based on issuance of permit or contracts. Inclement weather could affect the proposed project schedule.

- Estimated design completion: November, 2016
- Estimated construction start: Spring 2017
- Estimated construction completion: Spring 2019
- Anticipated work hours: 8:00 am -5:00 pm

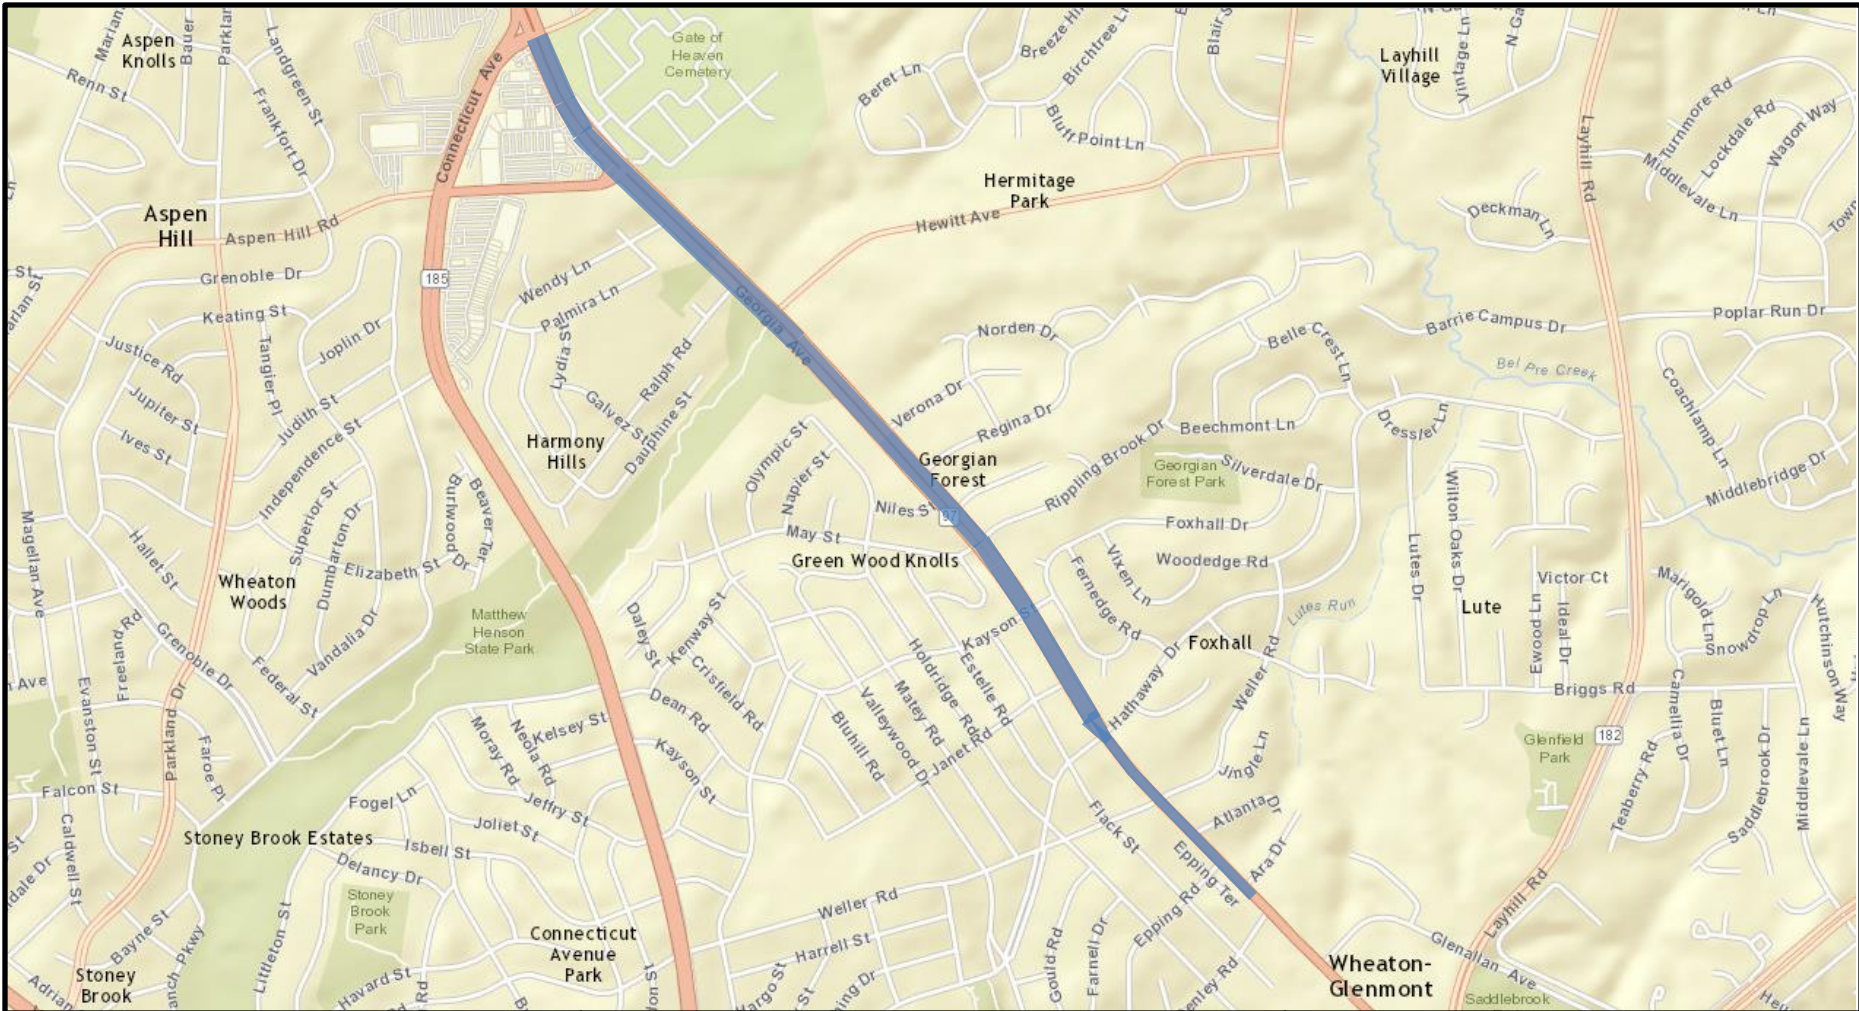

Environmental Impacts and Important Information

- **Water service may be interrupted for a few hours, while the new main is being connected. Customers will receive a 48-hour advance notification for service interruptions.**
- A 48-hour advance notification will be distributed to residents in the event of any parking restrictions and street closures.
- Some trees may have to be pruned or removed to accommodate the work. Residents will be notified prior to construction, if there is a need for any tree removal. All tree removal and pruning will be supervised by a WSSC Urban Forester.
- WSSC will restore the area when construction is completed.
