

St. Clair Drive 16" Water Main Replacement Project Project No. BT6417A17

A WSSC PROJECT IS COMING TO YOUR NEIGHBORHOOD! WSSC (Washington Suburban Sanitary Commission) maintains over I 1,000 miles of water and sewer mains and after nearly a century of providing safe and reliable water and sewer service to the residents of Montgomery and Prince George's counties, WSSC is facing the challenge of decaying infrastructure. In keeping with WSSC's commitment to providing our customers with safe, quality water and wastewater service, we are renewing our aging infrastructure at of a rate of approximately 60 miles of water mains and 56 miles of sewer mains annually.

WSSC plans to meet with your community in the near future to discuss this project. Additional information is forthcoming.

Project Overview

The purpose of this St Clair Drive 16" Water Main Replacement Project is to replace existing water mains. After nearly a century of service, WSSC is facing the critical challenge of decaying infrastructure. This project is necessary because the existing water mains were installed in the 1950s and are nearing the end of their life cycle. These mains will be replaced with new ductile iron pipe which will reduce the frequency of water main breaks. WSSC remains committed to providing its customers with a reliable supply of safe drinking water.

Scope of Work

Replacement of approximately 3,700 feet of 16-inch water main, 100 feet of 10-inch water main, 500 feet of 8-inch water main, 100 feet of 6-inch water main and 3,500 feet of water house connections to serve 24th Avenue, Lyons Street, St. Clair Drive and other various streets in the Hillcrest Heights area of Prince George's County, Maryland.

Project Schedule

The estimated project schedule for the St. Clair 16" Water Main Replacement, as denoted below is based on preliminary design and construction schedule. These dates may change based on issuance of permit or contracts. Inclement weather could affect the proposed project schedule.

- Estimated design completion: September 2018
- Estimated construction start: July 2020
- Estimated construction completion: July 2021
- Anticipated work hours: 7:00 AM to 3:00 PM

Environmental Impacts and Important Information

• Water service may be interrupted for a few hours, while the new main is being connected. Customers will receive a 48-hour advance notification for a planned service interruption.

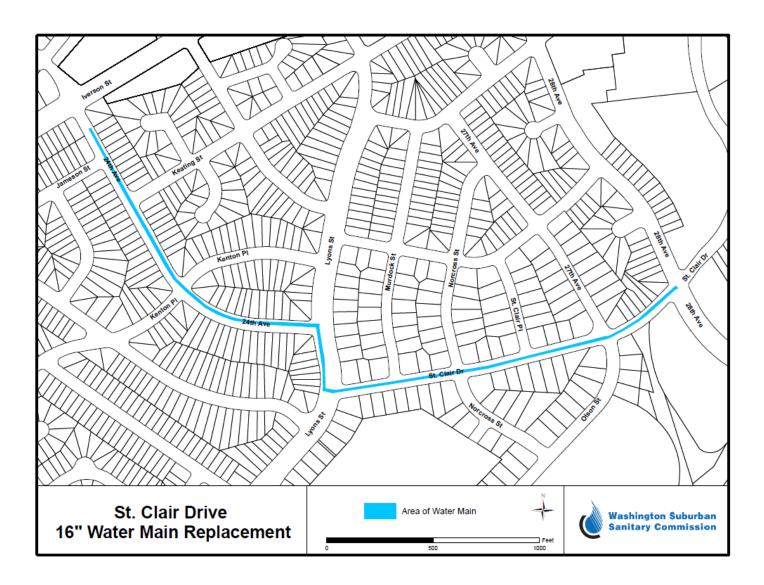

- A 48-hour advance notification will be distributed to residents in the event of any parking restrictions and street closures.
- Some trees may have to be pruned or removed to accommodate the work. Residents will be notified prior to construction, if there is a need for any tree removal. All tree removal and pruning will be supervised by a WSSC Urban Forester.
- WSSC will restore the area when construction is completed.
