Washington Suburban Sanitary Dis. Com., MD

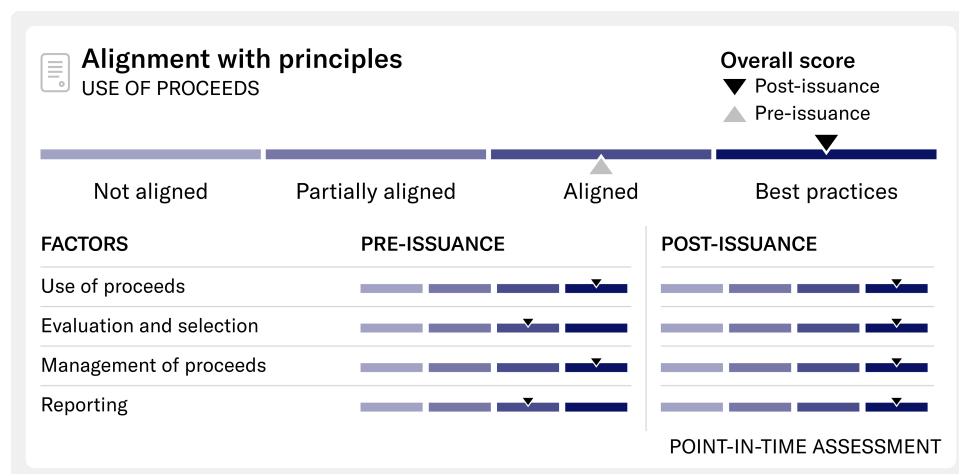

Post-issuance Second Party Opinion – CPI Bonds of 2025 (Second Series) (Green Bonds) Aligned with Principles

Summary

Within the scope of our work, we have assessed Washington Suburban Sanitary District, MD's (WSSC Water) Consolidated Public Improvement (CPI) Bonds of 2025 (Second Series) (Green Bonds), "the 2025 green bonds," issued in February 2025 under the district's use-of-proceeds green bond framework dated January 2025.

We assess that WSSC Water has allocated proceeds from the 2025 green bonds under the framework in alignment with the four core components of the International Capital Market Association's (ICMA) Green Bond Principles (GBP) 2025. Net proceeds from the 2025 green bonds have been allocated to two eligible categories defined in the issuer's framework, namely the Potomac WFP Consent Decree Program and the Large Diameter Water Pipe & Large Valve Rehabilitation Program.

The bonds have also incorporated all Moody's Ratings identified best practices, including transparency on project monitoring and reporting. This reflects an improvement from the pre-issuance alignment with principles score assigned to the 2025 green bonds, as detailed in our [Second Party Opinion \(SPO\)](#) that we published on 21 January 2025. Please see Appendix 1 for more information.

Scope

We have provided a post-issuance SPO on whether the proceeds from WSSC Water's 2025 green bonds issued in February 2025 to finance eligible assets were allocated in alignment with the ICMA's GBP 2025, as well as whether the issuance was in line with the district's commitments in its green finance framework dated January 2025.

Our assessment is based on the district's 2025 green bond allocation report published in March 2026, as well as its green finance framework dated January 2025. Our opinion reflects our point-in-time assessment¹ of the details contained in these documents, as well as other public and non-public information provided by the district.

Our work does not constitute an assurance, verification or audit.

We produced this SPO based on our [Assessment Framework: Second Party Opinions on Sustainable Debt](#), published in October 2025.

Issuer profile

WSSC Water provides water treatment and distribution, and wastewater collection and treatment to a population of two million in Montgomery and Prince George's counties in Maryland. The district's raw water is primarily supplied by the Potomac and Patuxent rivers with supplemental storage at four reservoirs, providing 27 billion gallons of additional supply. The district operates six wastewater treatment facilities with a combined capacity of about 96 million gallons of wastewater per day. As of fiscal year 2025, the system had approximately 486,000 water connections and approximately 455,000 sewer connections.

Key highlights

- » WSSC has allocated its 2025 green bond net proceeds in alignment with the ICMA's GBP 2025 and has incorporated all of Moody's-identified market best practices
- » The proceeds were fully allocated in six months, shorter than pre-issuance allocation period commitment of within 12 months of bond issuance
- » There were no material developments or cases where a project ceased to fulfill the eligibility criteria
- » The financed projects have been clearly reported using previously disclosed impact indicators

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the issuer/deal page on <https://ratings.moody.com> for the most updated credit rating action information and rating history.

Post-issuance Second Party Opinion detailed assessment

|--|--|
| ☒ Green Bond Principles (GBP) | ☐ Green Loan Principles (GLP) |
| ☐ Social Bond Principles (SBP) | ☐ Social Loan Principles (SLP) |
| ☐ Sustainability-Linked Bond Principles (SLBP) | ☐ Sustainability Linked Loan Principles (SLLP) |

We assess that the 2025 green bonds issued in February 2025 under WSSC Water's green bond framework dated January 2025 are aligned with the four core components of the ICMA's GBP 2025 and have incorporated all Moody's Ratings identified best practices. This marks a positive shift compared to the pre-issuance SPO. Supporting factors to the score change include ongoing monitoring of project compliance throughout the operational life of assets and commitments to maintain reporting over the assets' operational lifespan. A detailed assessment by factor for alignment with principles is provided below.

Use of proceeds

The net proceeds of approximately \$30.2 million received from the 2025 green bonds have been fully allocated, with near equal distribution across the framework's two eligible project categories, the Potomac Water Filtration Plant (WFP) Consent Decree Program (W-73.33) and the Large Diameter Water Main Rehabilitation Program (W-161.01), in accordance with the eligibility criteria outlined in WSSC Water's green bond framework dated January 2025. Proceeds were fully and exclusively used to finance capital improvements associated with the Potomac WFP Consent Decree program and its large water pipe and large valve rehabilitation program (see Exhibit 1). The 2025 green bonds represent the district's sixth green bond offering. As of fiscal year 2025 (ending June 30), the district has raised cumulative net proceeds of \$213.7 million (including investment income and bond premiums less issuance expenses) under its green bond program, disbursed across the project categories, as seen in Exhibit 2.

Under the Potomac WFP Consent Decree Program, the district reports that construction on the sediment basin filter backwash treatment facility and the gravity thickener expansion project were 86% and 77% complete, respectively, as of fiscal year 2025. The sediment basin filter backwash treatment facility includes construction of plate settlers, equalization basin and pumping station, while the gravity thickener expansion project includes construction of three new gravity thickeners to the facility for additional solids treatment.

We note that the deadline for long-term capital improvements agreed upon in the consent decree was extended from 1 January 2026 to 11 October 2026 based on the facility's final fact sheet permit submission to the state's Department of Environment. We expect that these projects when complete and operational are likely to improve solids handling and filtering at the facility to achieve permit limits as well as the no net annual discharge goals under the consent decree. The eligible projects financed have clear, relevant, and coherent environmental objectives, with measurable benefits that are in line with our pre-issuance assessment expectations.

Based on documents reviewed, the bond proceeds reimbursed 26.4% of eligible green bond expenditures across the two categories in fiscal year 2025. Actual program expenditures were below the estimated expenditures for the fiscal year. The district has confirmed that it has disclosed the full use of proceeds as going toward new financings, and it has confirmed that this information was disclosed at the time of issuance in the respective issuance documentation. There was no refinancing of prior assets, in line with pre-issuance commitments.

Process for project evaluation and selection

WSSC Water's decision-making process for the evaluation and selection of projects is clearly structured, as outlined in its public framework, and the district has confirmed that there were no changes and the process was followed for the 2025 green bonds. Eligible projects were identified and selected through the district's annual six-year CIP which evaluates projects against the district's 30-year asset management plan and incorporates engineering and demographic data to ensure future capital and service needs are addressed. The process draws on relevant internal expertise, including the general manager and district commissioners, and includes external review by the bi-county government and the Maryland National Capital Park and Planning Commission to support project validation.

WSSC Water has monitored project compliance with the framework's eligibility criteria on an annual basis until proceeds were fully allocated and remains committed to ongoing oversight throughout the operational life of the assets. Oversight activities include quarterly capital briefings on the status of the CIP program (including the eligible green programs)² to the district commission, monthly management reviews of project status and performance, and reporting on the Potomac Consent Decree to both the State of Maryland and the commission.³ Detailed systemwide operational performance⁴ is reported to the commission and is publicly available in agenda packets. The district also remains committed to the environmental and social risk management processes described in its framework and has confirmed that no material environmental or social controversies were identified and that all financed projects remained compliant with the applicable eligibility criteria.

Management of proceeds

WSSC Water has confirmed that all elements of its process for the management and allocation of proceeds remain the same as detailed in its framework and was followed for the 2025 green bonds. Net proceeds were deposited into a segregated account dedicated exclusively to eligible green projects and tracked through a formalized internal process. Consistent with the framework, proceeds were used solely to finance capital improvements associated with the two eligible green projects and were not used to refinance prior assets.

Proceeds were fully allocated within six months of bond issuance, resulting in no unallocated balance. This allocation timeline is shorter than the pre-issuance commitment to allocate proceeds within 12 months of bond issuance.

Reporting

WSSC Water's reporting is in line with its initial commitments on the frequency and scope of post-issuance reporting. The district has confirmed its commitment to ongoing reporting until full allocation of proceeds and in the case of material developments. Going forward, the district plans to provide more frequent reporting on a quarterly basis on the allocation of proceeds and impact metrics for the benefit of bondholders. The operational performance of the broader system, which includes the funded assets, are tracked, monitored and reported through its operational life and is available publicly on its website. The 2025 green bond annual report, which covers all green bond issuances under the program, is publicly available on WSSC Water's website and covers all information consistent with its pre-issuance commitments. The report includes information on the allocation of proceeds under the green bond program to date, the description of programs financed and the environmental benefits achieved.

All financed projects are supported by relevant and clearly defined impact indicators, namely the percentage of river solids removed under the Potomac WFP Consent Decree Program and the miles of large-diameter water mains replaced annually under the large diameter water pipe rehabilitation program. Reporting on these indicators is comprehensive and consistent with WSSC Water's pre-issuance commitments. Proceeds allocated to the Potomac WFP Consent Decree Program support reductions in solids removal at the plant level, above the minimum long-term performance standard under the consent decree, while proceeds allocated to the large diameter water pipe rehabilitation program support the district's ongoing capital improvement objectives by enhancing water distribution infrastructure reliability. Based on our review, the reported impacts are consistent with the financed projects, and no material deviations were identified in the reported impact metrics.

The methodologies used to calculate and report environmental impacts are publicly disclosed, supporting transparency and comparability of reported outcomes. WSSC Water has fulfilled its commitment to obtain an independent verification of proceeds allocation for its 2025 green bonds. In addition, the district has fulfilled its commitment to obtain an independent post-issuance review of the environmental benefits reported for the financed projects through this assessment, in line with best market practices.

Exhibit 3

Fiscal year 2025 impact reporting aligns with the district's pre-issuance commitments

Eligible category	Assets	Impact reporting metrics	Reported impact (FY 2025 Achievement)	Comment
Potomac WFP Consent Decree Program (W-73.33)	Sediment Basin Filter Backwash Treatment Facility and the Gravity Thickener Expansion Project	Percentage of river solids removed (%)	63.5% of river solids removed in 2025 from 2017 baseline on a two-year rolling average, exceeding the consent decree requirements to dewater and remove at least 50% of the river intake solids	Impact reporting is clear and relevant to quantify the reported benefits. The use of a recognized metric enables comparability and is in line with the impact indicators outlined in the issuer's framework.
Large Diameter Water Pipe & Large Valve Rehabilitation Program (W-161.01)	Water distribution pipes	Miles of large diameter water mains replaced annually	10 miles of large-diameter pipe work, exceeding the annual target of six miles

Moody's assigns SPOs in alignment with the main tenets of the ICMA Guidelines for Green, Social, Sustainability and Sustainability-Linked Bonds External Reviews and the LSTA/LMA/APLMA Guidance for Green, Social and Sustainability-Linked Loans External Reviews, as applicable; Moody's practices may however diverge in some respects from the practices recommended in those documents. Moody's approach to assigning SPOs is described in its Assessment Framework, and is subject to the ethical and professional principles set forth in the Moody's Investors Service Code of Professional Conduct.

Additional terms with respect to Second Party Opinions (as defined in Moody's Investors Service Rating Symbols and Definitions): Please note that a Second Party Opinion ("SPO") is not a "credit rating". The issuance of SPOs is not a regulated activity in many jurisdictions, including Singapore. JAPAN: In Japan, development and provision of SPOs fall under the category of "Ancillary Businesses", not "Credit Rating Business", and are not subject to the regulations applicable to "Credit Rating Business" under the Financial Instruments and Exchange Act of Japan and its relevant regulation. PRC: Any SPO: (1) does not constitute a PRC Green Bond Assessment as defined under any relevant PRC laws or regulations; (2) cannot be included in any registration statement, offering circular, prospectus or any other documents submitted to the PRC regulatory authorities or otherwise used to satisfy any PRC regulatory disclosure requirement; and (3) cannot be used within the PRC for any regulatory purpose or for any other purpose which is not permitted under relevant PRC laws or regulations. For the purposes of this disclaimer, "PRC" refers to the mainland of the People's Republic of China, excluding Hong Kong, Macau and Taiwan.
