

# Important Construction Update

## North Woodside Standpipe Rehabilitation Project

September 10, 2026

Dear Community Member:

WSSC Water is continuing to rehabilitate the North Woodside Standpipe, an existing water storage facility in your neighborhood. We are writing to let you know about an upcoming change to the project's work schedule.

### Updated Work Schedule

To help keep the project moving forward and allow additional time for daily site cleanup:

- **Monday – Friday:** Crews will now work nine-hour days between 8 a.m. and 6 p.m., adding one hour to the current workday.
- **Every other Saturday:** 9 a.m. – 5 p.m., beginning Saturday, September 19, crews will perform site cleanup, preparation work and painting.
- **No sandblasting will take place on Saturdays.**

### Standpipe Design Survey Results

Thank you to everyone who participated in our standpipe design survey. We are reviewing the results and will share an update with the community in the coming weeks.

### Questions?

If you have questions about the construction work, **please contact me at 301-206-8560 or at [Christopher.Deherde@wsscwater.com](mailto:Christopher.Deherde@wsscwater.com).**

More information and project updates are available at [wsscwater.com/north-woodside-standpipe-rehab](http://wsscwater.com/north-woodside-standpipe-rehab). Thank you for your continued patience and cooperation as we complete this important work.

Sincerely,

Christopher DeHerde  
Project Manager  
WSSC Water Facility Design and Construction Group
