CONDITIONS:

- 1. All work accomplished under this Permit shall comply with these below listed requirements, the WSSC Utility Erosion and Sediment Control Regulations, the State of Maryland "2011 Standards and Specifications for Soil Erosion and Sediment Control," the approved plan and any subsequent instructions issued to the Permittee by the WSSC.*
- 2. The Permittee shall give at least 48 hours advanced notice to the WSSC (Environmental Programs Unit) prior to commencement of any construction under this Permit (301/206-8077).*
- 3. The Permittee shall make the site, work, materials, and approved plan(s) available for inspection by the WSSC at all times during normal working hours.*
- 4. This Permit is subject to suspension by the WSSC whenever determination is made, and after written notice is issued, that the Permittee is in violation of WSSC Utility Erosion and Sediment Control Regulations Section VI, D promulgated under the law.*
- 5. All responsible supervisory field personnel involved in the construction of this project shall have a certificate of training for Responsible Personnel from a Maryland Department of the Environment's approved training program for erosion and sediment control.*
- 6. The Permittee shall perform work under this Permit in a manner that provides appropriate daily protection for all soil areas that have been disturbed and all excavated soil material, so that erosion and off-site sedimentation are prevented.*
- 7. Any surface drainage flowing through the site shall be safely channeled by utilizing diversions or dikes of stone or sandbags, metal or bituminized fiber pipe or other methods approved by the WSSC and shall not cause erosion or off-site sedimentation.*
- 8. All stream crossings and channel improvements shall be of a permeable nature and constructed in accordance with the Maryland Department of the Environment's Guidelines to Waterway Construction.*
- 9. Clearing, including top-soil stripping, shall be confined to the limits indicated on the approved plan.*
- 10. Any ground or surface water that is pumped during this project shall be discharged through a Dewatering Device approved by the WSSC prior to being discharged off-site.*
- 11. Any soil material that is deposited on public roads or streets by the Permittee shall be immediately removed.*
- 12. The Permittee shall vegetatively restore all disturbed areas of this project in accordance with the approved plan(s).*
- 13. This Permit shall expire either upon final acceptance by the Commission or two-years from the date of issuance unless revoked or renewed by the Commission, whichever shall first occur.*
