

Typical Residential Gas Meters

Gas Meters come in various sizes. They must be sized properly and in accordance with the pressure requirements of the equipment being installed.

Meter capacities in standard cubic feet per hour at various pressures

Meter Size	Low Pressure*	Standard Pressure	2psi**
AL250	240	325	354
AL425	425	550	1,010
AL425HC	425	900	1,010
1.5M	1,500	1,500	1,700

* 0.7 in w.c. pressure drop is allowed for across rotary meters in 5.5 w.c. systems

** A fixed factor is applied by the billing system for 2psi metering. A correct instrument is required for meters 16M and greater.
