

Washington Suburban Sanitary Commission Police

GENERAL ORDER

TITLE TRAFFIC STOP PROCEDURES			PROCEDURE NUMBER G.O. 352.0
SECTION Field Activities	DISTRIBUTION A	EFFECTIVE DATE 02/03/16	REVIEW DATE 02/03/18
REPLACES G.O. 300(2)			
RELATED GENERAL ORDERS	REFERENCES CALEA 61	AUTHORITY  Chief Harvey R. Baker	

I. PURPOSE

Pursuant to Public Utility 28-201, Section (b) 1. Sworn personnel of the Washington Suburban Sanitary Commission Police have the authority to conduct traffic stops on property owned, leased, operated by or under the control of the Washington Suburban Sanitary Commission (WSSC). This general order provides a clear and concise procedure to be utilized whenever an officer stops or approaches any traffic law violator on WSSC property. Traffic stops conducted outside of WSSC property are **prohibited unless pursuant to the immediate investigative follow-up of a suspected criminal offense on Commission property.**

II. PROCEDURES

Officers initiating traffic stops for violations should utilize the following procedures:

- A. When initiating traffic stops for MILES/NCIC hits, officers should trail vehicles until appropriate backup arrives.
- B. It is necessary for the officer to control the stop, **not the violator**. In most cases, it is possible for the officer to select the best location for the stop.
- C. After the decision to stop a traffic violator has been made, the officer will activate their emergency equipment to include lights and siren as appropriate to stop the vehicle. The Officer will then call out with a traffic stop, pause briefly to enable Communications to acknowledge, and give the location of the stop, the tag number and state of registration, color, make and model of

vehicle, and number of occupants, if known. After the vehicle is stopped, the officer will give Communications other necessary information and, if possible, for the officer's safety, he/she should wait for the information to be acknowledged by Communications prior to leaving his/her cruiser.

D. All Officers should:

1. Maximize their ability to light up the area at night, or at other times of low light, and request the violator to turn on his/her interior light.
2. Protect themselves by placing the cruiser in a position which affords the best protection from other traffic.
3. Maintain a safe distance from the cruiser to the violator's vehicle.
4. Maintain constant visual attention.
5. Form an evasion plan as the approach is made.
6. Consider approaching the vehicle from the passenger side on some stops. As the approach is made, stop at the rear of the vehicle, check the trunk and rear seat, and evaluate the situation inside of the violator's vehicle.
7. If the situation does not "feel right", do not hesitate to retreat and await sufficient backup before proceeding further.
8. Not stand directly opposite the driver's window. Stand slightly behind the door so that adequate vision of the vehicle's interior is available.
9. Return to the cruiser to write the citation or request information from Communications.
10. Never allow the violator to approach the cruiser while the officer is seated behind the wheel.
11. Be professional and courteous, but firm. Officers should take the appropriate enforcement action and attempt to alter favorably the violator's future driving habits.

III. RESPONSIBILITY

Operations Duty Commander will monitor the traffic enforcement activities of officers under his/her supervision to ensure the safety of the
