

Mt Airey Water Main Replacement

A WSSC WATER PROJECT IS COMING TO YOUR NEIGHBORHOOD! WSSC Water (Washington Suburban Sanitary Commission) maintains over 11,000 miles of water and sewer mains and after nearly a century of providing safe and reliable water and sewer service to the residents of Montgomery and Prince George's counties, WSSC Water is facing the challenge of decaying infrastructure. In keeping with WSSC Water's commitment to providing our customers with safe, quality water and wastewater service, we are renewing our aging infrastructure at a rate of approximately 60 miles of water mains and 56 miles of sewer mains annually.

WSSC Water plans to meet with your community in the near future to discuss this project. Additional information is forthcoming.

Project Overview

The purpose of this project is to replace existing water mains that have reached near the end of their useful service life, with installations dating to the 1960s and 1970s. Ductile iron pipe will be installed, which will reduce the frequency of water main breaks. In the event that water service lines are galvanized pipe, WSSC Water will replace the portion of the water service line between the public main and the property line connection, at no cost to homeowners.

Scope of Work

The project includes the replacement/relocation of approximately 3 miles of water mains, water house connections and outside meters/curb stops.

Project Schedule

The estimated project schedule for the Mount Airey Water Main Replacement, as denoted below is based on preliminary design and construction schedule. These dates may change based on issuance of permit or contracts. Inclement weather could affect the proposed project schedule.

- Estimated design completion: May 2018
- Estimated construction start: Summer 2018
- Estimated construction completion: Winter 2019
- Anticipated work hours: 8:00 a.m. to 5:00 p.m. (with lane closures as necessary between 9:00 a.m. to 3:00 p.m.)

Environmental Impacts and Important Information

- **Water service may be interrupted for a few hours, while the new main is being connected. Customers will receive a 48-hour advance notification for a planned service interruption.**
- A 48-hour advance notification will be distributed to residents in the event of any parking restrictions and street closures.
- Some trees may have to be pruned or removed to accommodate the work. Residents will be notified prior to construction, if there is a need for any tree removal. All tree removal and pruning will be supervised by a WSSC Water Urban Forester.
- WSSC Water will restore the area when construction is completed.
